

The figure is a plot with a single data point. The x-axis is labeled 'na_avian'. The y-axis has tick marks but no labels. A horizontal dashed line is drawn across the plot at approximately one-third of the way up from the bottom. The data point is represented by a teal circle with a white center, located slightly above the dashed line. A vertical gray error bar with horizontal caps at both ends passes through the center of the teal circle, extending from just below the dashed line to about two-thirds of the way up the y-axis.
